

TeamPro™

- The **TeamPro** service is designed to improve integration of teams, to build relationships and helps with teambuilding in a business environment.
 - **TeamPro** will deliver changes in behaviour and lasting results, because each individual sets personal goals and takes away actions to deliver change.
- **TeamPro** enables teams to set and agree shared objectives, to deliver changes in performance and achieve the desired results. This is facilitated over two half day workshops, where individuals record their implementation methodology and establish their personal goals.
 - **TeamPro** provides an environment to swiftly implement a culture change, obtaining collective buy-in through team coaching, group learning and shared vision.
 - **TeamPro** helps to identify new strategic vision and enables teams to work together to explore new ways of working and develop innovative solutions. Through the workshops all possibilities can be examined, leading to new opportunities being uncovered.

Testimonials

- “Improved my confidence in my management role”
- “...coaching sessions gave me motivation and inspiration...”
- “I have learnt to deal with stress, difficult people, and to explore other avenues when problems (no, my new word - situations !) arise”

What is included in the programme?

- A two hour pre-workshop assessment to agree strategic objectives for the workshop
- Two half day workshops to set individual goals and agree implementation plans
- A Personal Coaching Journal to record goals, outcomes, learning points and results

improving performance...
